

I claim

1. A method of discouraging the roosting or nesting of birds on structures comprising the steps of identifying roosting zones on the structure and applying thereto a slide comprising a sheet of material having a slick outer face and mounted to impose an angled surface that inhibits a bird's standing.

2. The method of claim 1 wherein the slide is formed as a peaked polyhedron with a plurality of exposed faces and is affixed to cap the roosting zone.

3. The method of claim 2 wherein the slide is formed as a prism.

4. The method of claim 2 wherein the slide is formed as a pyramid.

5. The method of claim 2 wherein the slide is formed as an inverted V.

6. The method of claim 2 wherein a bead of silicone adhesive is applied where the slide meets the roosting zone.

7. The method of claim 1 wherein the slide is formed as a cone and is affixed to cap the roosting zone.

8. The method of claim 1 wherein the slide comprises a sheet that follows a slope of the structure and covers the roosting zone.

9. The method of claim 8 wherein the slide has a periphery and a bead of silicone adhesive is applied along the periphery to prevent anchoring of nesting materials under the slide.
